Qualified performance! The best design! Hyundai 9 Series medium-size diesel forklift

Hyundai introduces a new line of 9F-series diesel forklift trucks.

These forklifts deliver outstanding performance for every working environment and economic value.

The new Hyundai diesel forklifts bring you efficiency and comfort.

- 
- A yellow and black Hyundai 45D-9F counterbalance forklift is shown in a concrete structure. The forklift is viewed from a rear three-quarter angle. The body is primarily yellow with black accents. The mast is black with 'HYUNDAI' written vertically. The model number '45D-9F' is printed in green on the side. The forklift has a large operator's cab with a glass window and a steering wheel. The background consists of concrete walls and beams.
- Powerful performance
 - Spacious operating space
 - Grammer seat standard
 - Push-type inching system
: inching pedal, pedal force relieved
 - 5.6 inch LCD color monitor
 - Machine inclination warning system
 - Speed limit setting
 - Operator Presence Sensing System (OPSS)
 - Load weight indicator
 - Auto fork leveling system (OPT)

Power & Performance

Strong power, High performance

The 9F-series forklifts are designed to achieve optimized performance in any work environment.

HIGH PERFORMANCE

POWERFUL ENGINE

Some of the photos may include optional equipment.

Powerful and economical KUBOTA V3800 Engine!

(Complies with Tier-4 exhaust gas regulation)

No Adblue required due to adoption of device for postprocessing DOC exhaust gas

The electronic turbo KUBOTA engine guarantees optimized work efficiency under any working conditions. Fuel efficiency is enhanced and high capacity with low noise is realized by direct injection and optimized driving system. In addition, there's no need to inject Adblue due to adoption of the Diesel Oxidation Catalyst (DOC) as an exhaust gas postprocessing device. It is possible to reduce maintenance costs and maintain easily.

75.3PS/56.1kW@2,200rpm (gross)
228.5lbf-ft/31.6kgf•m@1,500rpm (gross)

Highly Durable Transmission

The two-speed powershift transmission provides smooth efficient operation with both automatic and manual shift modes. The clutch protection system prevents excessive use of inching as well as minimizes change-impact.

Powerful drive axle and wet brake

A strong drive axle separate from the transmission ensures low vibration and easy maintenance. The wet disc brake system is virtually maintenance free and the enclosed design protects from dust and water.

Hydraulic Brake Booster

Hydraulic assisted brakes provide strong, consistent brake performance.

Fully hydraulic steering system

The hydraulic steering system guarantees simple and quick operation, preventing kick-back.

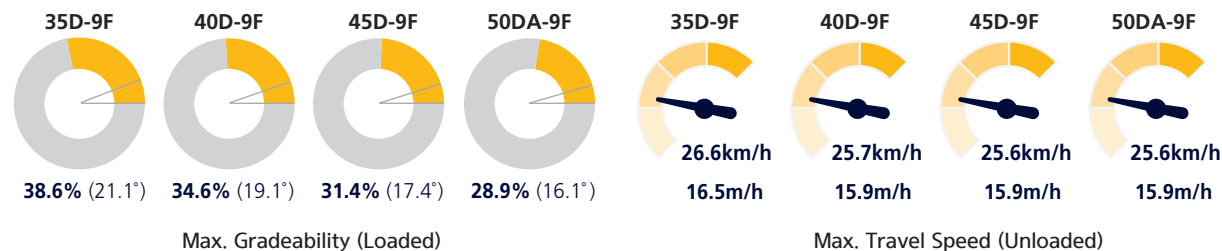

Integrated wheel rim

The integrated wheel rim provides significantly increased service life.

Excellent gradeability and travel speed

Equipped with the most powerful engine in its class, the 9F-series can perform stable operations and provides excellent gradeability and fast travel speed on any tough terrain or slope.

Easy & Comfort

Comfortable work space Intuitive monitoring

Ergonomic design for convenience of the operator

Wider visibility and intuitively configured monitoring system

We ensures your comfort in any work environment.

COMFORTABLE WORKSPACE

ADVANCED MONITORING
SYSTEM

45D-9F

Some of the photos may include optional equipment.

Ergonomically designed operating space

The ergonomically designed operating space will further enhance the operator's work efficiency. The elevated seat with back rest and a handle with a reduced diameter enlarge the frontal view while reducing the operator's fatigue. The adoption of an A4-sized tray increases the convenience of document storage, while the 12V power socket (optional) facilitates the use of small electronic products.

Grammer seat (STD)

Easily adjustable suspension seat, based on a human engineering design, reduces operator fatigue and provides greater comfort.

- ELR (Emergency Locking Retractor) type seat belt as a standard
- Heating and head rest (OPT)

Automatic gear shift

When accelerating at 5 km/h or faster, the gear shifts automatically from first to second; and when decelerating at 3 km/h or slower, it shifts from second to first. Thus enhancing the operator's convenience.

Adjustable tilting handle

The angle of the steering column can easily be adjusted to improve driver comfort.

Open footplate

A larger safety footplate with antislip provides convenience and safe access for the operator.

5.6-inch large screen LCD monitor

The TFT LCD color monitor with 5.6-inch large screen allow the operator to identify speed, driving direction, and operating hours at a glance and control the vehicle efficiently. Fault diagnosis is possible without any additional diagnostic apparatus due to the message delivery function.

Speed limit setting

As the vehicle's speed limit can be set up between 8 and 20km/h at 1km/h, operator can comply with the speed limit.

Machine inclination indication

The grade and slope sensors are built into the MCU and provide the machine's inclination in real time.

A warning alarm is triggered if the KS STD limit is exceeded.

Load weight indicator

The precise load sensor reduces the time taken to measure a carriage load, and a warning is given at the time of overload.

Main monitoring features

- Driving speed gauge
- Hour-meter
- Fuel gauge
- Engine temperature gauge
- Gear status indicator
- Other indicator lights / warning lights

Secure & Safety

Excellent visibility Reliable safety

Interior space and strength are designed with safety as the priority, thus enable the operator to focus on work safely and conveniently.

EXCELLENT VISIBILITY

ADVANCED SAFETY

Some of the photos may include optional equipment.

Wide visibility for Safe Operation

The optimized lift cylinder array design provides a clear, wide field of vision for the operator. The adoption of a panorama mirror improves the rear side view, further enhancing safety.

Some of the photos may include optional equipment.

High-strength overhead guard

The strong overhead guard meets the ANSI regulations and provides wide visibility by increasing the opening in the ceiling.

Rear view camera (OPT)

The rear-view camera and monitor inter-operated with the reverse gear ensure a safer rear-side work environment.

Panoramic mirror

The adoption of the panoramic mirror eliminates blind spots at the rear and ensures a wider rear view.

Various Safety System

The adoption of a high-sensitivity sensor and advanced safety system eliminates the risk of safety accidents.

AUTO PARKING

Auto parking brake (OPT)

If the operator leaves the seat while the gear lever is in neutral, the parking brake is automatically engaged to secure safety, and released upon the operator's return to the seat.

Fork safety features

The down-safety valve prevents forks from dropping down in case of sudden damage of hydraulic line.

DRIVE LOCK LIFT LOCK

Operator Presence Sensing System

All mast and drive movements stop functioning when the operator is not in the seat.

Mast Accumulator for load cushioning (OPT)

The accumulator installed at the side of mast prevents the lift cylinder from moving up and down when driving on an uneven road surface.

Maintenance & Convenience

Easy maintenance Various convenience devices

Ideal design for daily inspection and maintenance.
High-quality convenience devices for operator
Operator can work in the best conditions
in any environment.

EASY MAINTENANCE

BEST CONVENIENCE

45D-9F

Large Engine Hood

An ideal arrangement of components ensures easy access and convenience for maintenance. The enlarged air cleaner (8") has extended service time of engine and durability has been improved with the adoption of a bonnet gas spring (left/right).

Waterproof & Dustproof cover

Newly developed waterproof and dustproof fuse box and relay box for ease of maintenance.

Engine fault diagnosis

Details of engine fault diagnosed by the engine control unit (ECU) can be checked on the dashboard.

Maintenance management

This indicator automatically alerts the operator of the replacement cycle of key consumable items.

Various convenience devices

Various functions provide safety and convenience for operator.

Emergency switch (OPT)

A button-type switch enables to notify of emergency situations quickly.

Password starting system

The equipment can be managed safely and protected from theft by designating operator's right.

Wide cabin (OPT)

A wide cabin can be selected (60 mm wide and 125 mm long) for wider indoor space.

Fuel cover with key

Locking fuel inlet door prevents theft.

Bolt on type cabin

The bolt on type cabin consists of front side, door front, door rear, and rear side. It is easy to assemble by bolt and mount parts. Also, the cabin can be selected by module or parts and air conditioner and heater are separately available for driver's comfort.
