

40PPW Powered Pallet Walk

<u>ADVANTAGE</u>

- Ergonomic, Compact and Safe Long Tiller Design
- High Performance Maintenance-free AC Drive Unit
- High Ground Clearance for Tough-ground Applications
 Competitive Cost with Excellent Performance

Special Design

Special design for fork tip with 3 entry rollers and 4 exit rollers for easy entry and exit of the pallet, esp. when the pallet is empty or light loaded.

Large Capacity Maintenance-free Battery

Equipped with 24v/160Ah maintenancefree battery, with working time 12 hours according to the VDI calculation, or for continuous work of 7 hours.

There are many advantages comparing to Lead-acid battery:

No acid refilling maintenance.

Less cable corrosion with the connection pile head.

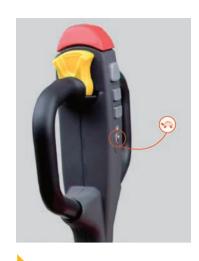

More protection on over-charging Bigger initiating current.

Longer electricity storage time. More environment-friendly.

Built-in Charger

The built-in charger is located above the battery, easy charging after opening the battery cover.

Creep Button

Creep/Slow speed button for safe and easy operation esp. in confined spaces such as steering in the trailer.

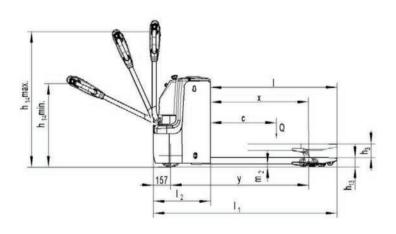

High Ground Clearance

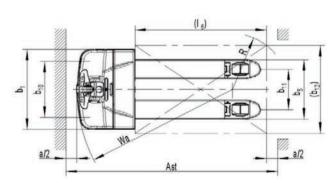

High ground clearance, for easy operation for uneven grounds with potholes or small obstacles such as small thresholds or on trailers with lifting gates.

Robust and Reliable Design

The robust chassis with the strong 8 mm thick apron protects the truck and the components against mechanical impacts from the outside. The steel battery cover ensures the battery well protected. IP54 protection for the controller for safe operation for delivery applications where the dust and water droplets is common.
